

## WIRED RGB CONTROLLER

**SPECIFICATIONS:** Working Temp:-20-60°C Operating Voltage: Smooth DC 12-24V External Dims: 120mmX75mmX33mm  
Output: Three CMOS open-drain Common Anode rated at 4 Amps Max. each channel

Mode #	Pattern	Remarks
1	Static Red	Brightness adjustable
2	Static Blue	
3	Static Purple	
4	Static Green	
5	Static Yellow	
6	Static Cyan	
7	Static White	
8	3-color jump	
9	7-color jump	Brightness & Speed Adjustable
10	3-color gradual change	
11	7-color gradual change	
12	Red Strobe Flash	Brightness & Speed adjustable
13	Blue Strobe Flash	
14	Purple Strobe Flash	
15	Green Strobe Flash	
16	Yellow Strobe Flash	
17	Cyan Strobe Flash	
18	White Strobe Flash	
19	Red/Blue Crossfade	Speed Adjustable
20	Blue/Green Crossfade	
21	Green/Red Crossfade	

**ATTENTION:**

- Supply voltage to this product is 12 to 24 volts Smooth D.C. Voltage other than this will damage or destroy the unit.
- Manufacturing defects of this unit will be repaired or unit replaced at no charge within one year of purchase, excluding damage caused by abuse, overloading, and/or failure to follow proper installation and usage instructions.
